

## Honey Brothers Peasmarsh

The construction of a large new retail unit, workshop, store, offices and car park for a specialist tree surgery and garden equipment company.

The new unit was constructed on a live site as Honey Brothers continued trading from existing buildings and temporary units whilst the works progressed.

The exterior was formed from traditional brick and blockwork, with a large section of timber cladding, the roof was constructed with trusses and covered in a cementitious roof sheets.

Internally, the rough timber panelling and metal shelving provided a modern rustic finish which the clients coveted in order to showcase their retail products.
