

Private House

Esher

Construction of a 5 bedroom house in Esher, we were appointed by the client to build their new home.

The works included a large basement, an indoor swimming pool, intelligent AV systems, extensive bespoke joinery and a large external works package.

Although the construction was undertaken using traditional methods, the design adopted a modern architectural style. This encompassed a large open plan ground floor, extensive use of glazing, internal brickwork and clean minimal finishes.

The contemporary design combined with quality workmanship has resulted in a beautiful family home.
