

St Joan of Arc Farnham

We were appointed by the Diocese to build a new church community centre alongside St Joan of Arc Church. The new centre consisted of a new reception, main hall, meeting rooms, kitchen and toilets.

The centre was built in the same style as the Church so traditional methods of construction were adopted. Construction involved a concrete ground floor slab, steel frame, traditional cavity wall construction and a clay tile roof. The new centre also comprised large arched feature windows and traditional stone details.

The new community centre is a fitting addition to the exquisite St Joan of Arc Church.
