

## Treloar College Alton

Treloar College provides further education to students with special needs. We were appointed to carry out the complete refurbishment of their swimming pool and changing facilities.

The project had a number of challenges due to the proximity of the site to the college and the special requirements of the students that we were required to work around.

The changing rooms and swimming pool were fully fitted to cater to the needs of the students. A full hoist system was installed and the bespoke hydrotherapy pool utilised music and lights to provide a complete sensory experience.

The college can be proud of the top class facilities now available to their students.
